Eduardo Izidoro Gazolla

Java Developer · Back-end — Career transition · Currently QA at DB1

> Moving from QA into back-end development with Java and Spring Boot. I built a REST API with a layered architecture, Flyway migrations and unit tests with JUnit 5 and Mockito, reviewed by a mentor. Since February 2025 I have been a QA Analyst at DB1 on a multi-tenant e-commerce platform, validating business rules and OMS, ERP and gateway integrations and writing BDD scenarios: a foundation I bring to writing testable code.

HIGHLIGHTS

REST API
JAVA 17 · SPRING BOOT 4
Full CRUD, pagination, soft delete and tests with JUnit 5 and Mockito.

OMS · ERP · Gateway
INTEGRATIONS · E-COMMERCE
Validating e-commerce integrations in production.

3 launches
QA · E-COMMERCE
Mobile app (iOS and Android) and 2 e-commerce sites.

~3× faster
QA · POST-DEPLOY
Post-deploy smoke test instead of the full regression (team estimate).

PROJECTS

REST API · Voll.med — 2026

Java 17 · Spring Boot 4 · github.com/eduardogazolla/api-rest

- REST API for managing doctors, with **full CRUD**, pagination, sorting, soft delete and reactivation.
- **Layered architecture** (Controller → Service → Repository), record DTOs, Bean Validation and **centralized error handling**.
- Spring Data JPA with MySQL, schema versioned with **Flyway**, and Swagger (SpringDoc) docs.
- **Unit tests with JUnit 5 and Mockito**, running on H2 without MySQL. Code reviewed by a mentor.

Personal portfolio — 2026

Next.js · React · TypeScript · Playwright · eduardogazolla.dev

- Bilingual site with a headless CMS and a server-validated contact API, covered by **400+ unit tests and 50+ Playwright E2E tests**.

Hour Sync — 2024

Time tracking · college capstone · React · Node · hoursync.vercel.app

EXPERIENCE

QA Analyst — Feb 2025 – Present

DB1 Global Software · Automotive retail client
In-house multi-tenant e-commerce platform.

- Tested the **launch of the e-commerce mobile app** (iOS and Android) and two sites, and **support** one of them with regression and smoke tests on every deploy.
- Validate **OMS, ERP and payment gateway integrations**, checkout and back-office features.
- Write **BDD/Gherkin test cases** and log bugs in Jira by **layer (front, back, API, services)**, pointing to the defect's technical origin.
- Automate **E2E tests with Playwright and TypeScript** using the Page Object Model.

Administrative Assistant — Jan 2023 – Feb 2025

Loja Comac · Cianorte, Brazil

IT Intern — Jan 2022 – Jan 2023

IAT – Instituto Água e Terra (state environmental agency) · Cianorte, Brazil
